

		IMT Standen's Environmental Policy	
Issue Aug 2023 JF Gratton President	Revised July 2026 Dominique de Souza Operational Excellence Manager	Approved July 2026 Denis Brisson Chief Transformation Officer	POLEMS
			Rev.: D
			Page 1 of 1

At IMT Standen's Limited Partnership, we take the necessary measures to protect the environment, conserve energy and natural resources, and reduce pollution by applying appropriate management practices and technology.

Our Commitments

- Compliance & Leadership** We will meet or exceed all applicable environmental laws, regulations, and voluntary commitments. As a responsible corporate citizen, we aim to lead by example in every region where we operate, fostering a culture of environmental and climate responsibility throughout our organization.
- Climate Action & Pollution Prevention** We proactively identify and assess environmental and climate-related risks across our operations. By implementing effective controls and mitigation strategies, we strive to reduce greenhouse gas emissions, air and water pollutants, and other harmful outputs.
- Sustainable Resource Management** Through efficient energy use, waste reduction, and responsible sourcing, we aim to minimize our consumption of natural resources and reduce our contribution to climate change.
- Continuous Improvement & Accountability** We are committed to the ongoing review of our environmental and climate objectives. By monitoring key performance indicators and evaluating emerging risks and opportunities, we continuously adapt our strategies to align with stakeholder expectations, evolving regulations, and best practices.
- Transparency & Engagement** This policy will be made openly available to all employees, contractors, suppliers, customers, and the public. We encourage collaboration and dialogue to strengthen our environmental performance and climate resilience.
